

Kyle Peng

San Jose, CA | (925)-984-8290 | pengkxyz@gmail.com | linkedin.com/in/kylepeng

EDUCATION

M.Eng. Computer Science

Cornell University

Expected May 2027

Ithaca, NY

B.S. Computer Science

Rose-Hulman Institute of Technology

May 2026

Minors in Mathematics & Data Science

Terre Haute, IN

Cumulative GPA: 3.71/4.0 | Major GPA: 3.86/4.0 | *magna cum laude*

EXPERIENCE

Innovation Intern

Supernova Technology

June 2025 – Sep. 2025

Chicago, IL

- Built agentic AI workflows and automated data pipelines to classify thousands of funds into 87 distinct categories with a 93% accuracy rate
- Engineered advanced prompt strategies to maximize LLM precision in extracting data from unstructured regulatory compliance files
- Developed scalable data ingestion systems that reduced manual review time by tens of hours

Artificial Intelligence Intern

LumaDent

July 2024 – Aug. 2024

Reno, NV

- Deployed a semantic segmentation framework (Landing.ai) to automate the classification of third-party dental hardware, enabling instant compatibility matching for mounting systems
- Achieved a 63% improvement in identification accuracy, streamlining the hardware configuration process for diverse client specifications

Computer Science Intern

Echelon Diagnostics

May 2022 – July 2022

Reno, NV

- Developed OpenCV-based image processing algorithms for automated COVID-19 test kit analysis
- Created Python-based neural networks to classify diagnostic results and minimized false positives

PROJECT EXPERIENCE

Origami Research - Catapult Games | *Typescript, React*

Jun. 2026 – Aug. 2026

- Engineered 3 original interactive social deduction and strategy games in TypeScript, establishing dynamic testbeds to benchmark LLM capabilities
- Architected multi-turn game state management based on Catapult SDK to handle asynchronous model interactions and complex game logic

Phantom - Senior Capstone | *Typescript, Docker, Git*

Sep. 2025 – May 2026

- Engineered a system that ingests, processes, and analyzes large-scale operational and security data to enhance threat detection, monitoring, and resilience
- Collaborated with senior engineers to design and validate core components of a distributed processing system focused on real-time monitoring and threat-resilience
- Recieved CSSE Department Award for Best Capstone Project

Personalized Music Recommender | *Python, scikit-learn*

Jan. 2026 – Feb. 2026

- Spearheaded the development of a content-based filtering system with cosine similarity and vector embeddings, solved initialization problems in recommendation engines

TECHNICAL SKILLS

Languages: Java, Python, C++/C, HTML/CSS, TypeScript, JavaScript, MSSQL Server

Frameworks: PyTorch, Keras, OpenCV, Tailwind CSS, Flask, React, Playwright

Data & Deployment: Docker, AWS, Git, OpenSearch, FastAPI, Elastic Stack
